

## **ComplementSoft\* and Gupta Programming Announce Development & Marketing Alliance For Clinical Trial Reporting Templates**

Chicago IL & Simi Valley CA, May 6, 2002 - [ComplementSoft LLC](#), a software development company building ASAP\* - The Software Productivity Tool for SAS\*\*, and Gupta Programming, a leading consultancy to the Pharmaceutical Industry, announced today the formation of a development and marketing alliance to deliver standardized clinical trial reporting templates for FDA reporting submissions.

With ASAP's Template Manager\*, users have been able to both edit existing and build new SAS programs more quickly and efficiently by using the SAS syntax templates built into the Template Manager. In conjunction with Gupta Programming, complementSoft will now be offering through it's Template Manager standardized best practices file structure and SAS templates that offer all the Clinical Trial Reports needed for FDA submission. Companies can now standardize on a series of templates that meet all FDA requirements. Smaller biotech companies can now complete their reporting requirements more quickly for less dollars.

Ed Schroeder, CEO of ComplementSoft said today "We are extremely pleased with this new product offering and relationship. Gupta Programming has long been regarded as a premier consultant when clients are looking for SAS\*\* assistance in clinical trial reporting. Their willingness to partner with us is a real vote of confidence in our technology and vision for our products in the pharmaceutical industry. Pharmaceutical companies are looking for ways that can help collapse the time period for generating their clinical trial reports for FDA submissions. With the templates and best practices file structures, companies will find that not only will they be able to submit faster, but the standardized delivery and file structure will help in navigating FDA approval for quicker turnaround and approval."

Sunil Gupta, President of Gupta Programming, stated "We are very pleased with the delivery of the Clinical Trial Reporting Templates in ASAP's Template Manager. Both small and large companies can easily incorporate and take advantage of these templates from the Template Manager. The data flow diagrams in ASAP's visualization tool provides added value in the documentation and validation of all programs required for FDA submission. Having the Clinical Trial Reporting Templates available from the ASAP application was a natural fit."

### **About Gupta Programming**

Gupta Programming was founded by Sunil Gupta. Sunil is a recognized SAS expert especially with regard to Clinical Trial Reporting requirements. A published author on SAS usage, Sunil has been the lead SAS programmer on several FDA drug submissions and has delivered numerous papers at both SUGI and regional SAS User conferences on aspects of Clinical Trial Reporting.
